

Silkolene

SILKOLENE MAG COOL

A premium performance coolant based on mono-ethylene glycol. Free from nitrites, amines, phosphates and silicates.

Description

SILKOLENE MAG COOL is a mono-ethylene glycol based ready to use long life coolant and anti-freeze designed for use in motorcycle, scooter and quad bike engines especially those containing magnesium alloy technology.

MAG COOL is free from nitrates, silicates and phosphates and is formulated using the latest advanced Organic Acid Technology (OAT). SILKOLENE MAG COOL protects highly stressed engines from frost, overheating, corrosion and cavitation.

SILKOLENE MAG COOL is suitable for and compatible with all materials commonly found in motorcycle engine coolant systems.

Application

SILKOLENE MAG COOL is a ready to use high performance motorcycle coolant and antifreeze for all round use.

Do <u>**not</u>** dilute SILKOLENE MAG COOL with water, this will reduce its frost and corrosion protection.</u>

We do not recommend that MAG COOL is mixed with other coolants as some may not be compatible.

Advantages

- Ready to use, mixed with demineralised water
- Prevents cavitation and provides excellent corrosion resistance and deposit control
- Compatible with magnesium alloys, aluminium, plastics, elastomers and gasket materials used in modern engine cooling systems
- Provides frost protection down to -40°C
- Contains a bittering agent

Further Information

Typical Data: SILKOLENE MAG COOL

| Characteristics | Method | Unit | Result |
|-------------------------|------------|------|--------------|
| Appearance | Visual | | Light Orange |
| Specific Gravity @ 20°C | IP 160 | | 1.068 |
| pH-Value | DIN 51 369 | | 8.6 |
| Boiling Point | ASTM D1120 | °C | >105 |
| Frost Protection | | °C | -40 |
